# CCTV Maintenance, Servicing and Repairs

CCTV maintenance is a preventative service to ensure that surveillance equipment is operational and free from breakdowns.

To maintain the effectiveness of your CCTV system you will need to have a regular maintenance plan in place. We provide professional CCTV servicing and repairs for all types of systems at a competitive price and availability of qualified engineers 24/7. All of our CCTV repairs and maintenance services are in accordance with SSAIB code of practice and manufacturer guidelines.

**We can upgrade existing cameras, keeping your existing CCTV system.**

**Upgrade Don't Replace**

## Maintenance Service Includes the Following

- Inspect all control equipment such as DVRs, NVR, hard-drives, monitors for correct operation.
- Check mains and power supplies including stand-by batteries and charging rates.
- Check time and date settings and update the settings as necessary
- Inspect the quality of recording during day time and night time modes
- Clean cameras, lenses and housing surfaces as necessary.
- Inspect brackets, towers and fixings for corrosion or damage.
- Check clamping bolts/brackets are tightened correctly
- Check the integrity of all cabling for any sign of damage
- Check all camera presets and test alarm presets as applicable
- Provide quick user training as necessary.
- Engineer activity report.
